

Concentrating PFAS waste streams generated during drinking water treatment

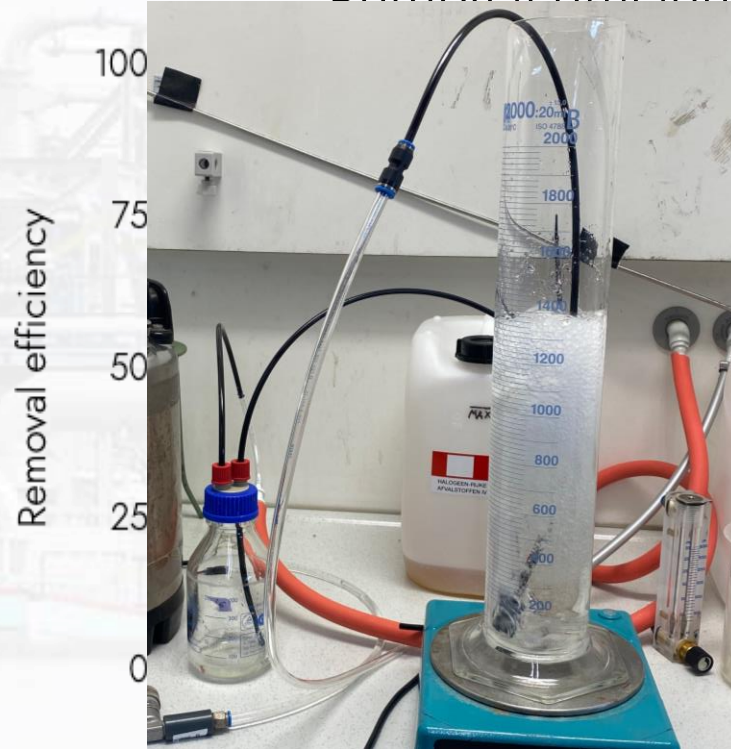

Joséphine van Ruiten

Dutch people are ingesting more PFAS than the provisional health-based guideline

Urgent demand to remove PFAS from drinking water.

What to do with the generated waste stream?

Removal efficiencies: nanofiltration waste stream

All-silica BEA zeolites

Foam fractionation

- Short-chain PFCA
- Long-chain PFCA
- Other
- Short-chain PFSA
- Long-chain PFSA
- Total PFSA
